

BIOCELERATOR
BIOLOGICAL MEDIUM STIMULANT

**IMPROVED GROWTH, YIELD,
DEFENCE & HEALTH**

FOR TOMATO FARMING

BIOCELERATOR FOR VEGETABLE, GRAINS & FRUIT

Biocelerator water conditioners have an incredible impact on natural biological processes that are essential for productive soil and plants. Use of Biocelerator improves abiotic stress tolerance and supports conditions for better plant establishment, vigour, ongoing health and natural defences to the plant.

- Triggers an explosion of beneficial microbes in the soil and on plant foliage
- Establishes a balanced soil ecosystem that optimises plant health
- Improves the soil's ability to nourish plants, absorb and hold water
- Improves soil tilth and elevates plant defense mechanisms
- Totally organic with NO chemicals, NO fertilisers, NO bacteria or enzymes
- Creates a super fertiliser when added to manure water or natural fertilisers
- Strengthens plant durability and provides protection for transplantation
- Easy and safe to apply by adding to water tanks for irrigation

30%

increased seedling growth vs control

15%

increased seedling yield vs control

100%

seed to seedling success vs 70% control

FASTER growth. Better vitality and natural defence

SEED TO SEEDLING GROWTH

HYDROPONIC FARM - INDIA

Notes from customer:

Increase germination speed much faster than control.

The seedling growth and vigour shows a difference of 25 – 30% than control tray growth.

Less damage to plant seedling after transplant than control

The product was used at the ratio of 1:1000 (1 part per thousand parts water), kept for overnight, then used the next day until transplantation.

After confirming the increased germination speed and good plant growth, we have used the product for our subsequent seed germination trays.
